

Specification of subjects in doctoral studies

Subject code: ДМ2.2131А
Study program: Technologies, management and design of furniture and wood products
Type and level of studies: Doctoral studies
Subject name: Interior elements
Teacher (s): Milena Kordić, DSc
Associates:
Subject type: elective
ECTS: 8
Condition:
Subject aim: The objective of the course is to provide a student with a specific knowledge base related to the design of interior elements. The subject introduces the student to a complex relationship of knowledge and skills, thinking and creation, which is crucial for creative disciplines to play an active role in modern life. By building knowledge about the width of the context in which the design and implementation of interior elements are conceived, the student is able to establish links between contemporary discourses of reference for his field of research.
Subject outcomes: The outcome of the course is understanding the balance between conceptual and practical learning in the design of interior elements. Developing abstract models of thinking and their relationship with specific procedures (methods) of engineering and design of interior elements.
