

Specification of subjects in doctoral studies

Subject code: ДМ2.1111Б
Study program: Technologies, management and design of furniture and wood products
Type and level of studies: Doctoral studies
Subject name: Management of enterprises for furniture and wood products production
Teacher (s): Slavica Petrović, DSc
Associates:
Subject type: elective
ECTS: 8
Condition: That the student enrolled in doctoral studies of the narrow scientific field Wood trade and economics of wood processing and successfully mastered the subject matter of the subjects: Methodology of scientific and research work and Techniques of scientific and research work.
Subject aim: By studying this course the students gain knowledge about the management of enterprises for the production of furniture and wood products. The classification of matter is governed by management functions, which is an analytical framework used throughout the world. By taking these functions, future wood processing doctors, as researchers or managers, can significantly contribute to achieving better results in an enterprise by creating an environment for the effective and efficient activity of individuals working together in teams.
Subject outcomes: The acquisition of theoretical and practical knowledge in this field will enable the wood industry engineers to actively participate in the management of enterprises for the production of furniture and wood products.
