

Specification of subjects in master studies

Subject code: M41108 / M41114
Study program: Ecological engineering for soil and water resources protection
Type and level of studies: Master's degree studies
Subject name: Policy and management of sustainable land development
Teacher (s): Miodrag D. Zlatić, DSc; Mirjana M. Todosijević, DSc; Katarina Lazarević
Subject type: compulsory
ECTS: 5
Condition:
Subject aim: The goal of teaching and exercises in this course is to introduce students to the policy of sustainable development, management and protection of natural resources in accordance with the policy of using land at the local and national level as well as the level of the European Community. In terms of sustainable management, the goal is to introduce the students, in a theoretical and practical way, to a new social relationship in the management of natural resources and land with a full responsibility for future generations.
Subject outcomes: Acquired knowledge in the field of policy and sustainable management of natural resources will enable the students to make the right decisions related to the local environment.
