

Specification of subjects in Master's degree studies studies

Subject code: MIII21105/B
Study program: Forestry
Type and level of studies: Master's degree studies
Subject name: Harmonization of forest and hunting management
Teacher (s): Dragan Gačić, DSc
Subject type: elective
ECTS: 6
Condition: Completed undergraduate studies.
Subject aim: The aim of this course is to introduce students to the types of damage to forest and agricultural cultures, and provide them with the basic knowledge about the causes of damage from game and measures to prevent or reduce that damage.
Subject outcomes: By studying the subject, students acquire the necessary knowledge that will enable them to prevent (or significantly mitigate) damages and economic losses in forestry and agriculture, as well as to successfully identify the type of damage and assess its scope and intensity.
