

Specification of subjects in undergraduate studies

Subject code: EI34732
Study program: Ecological engineering for soil and water resources protection
Type and level of studies: undergraduate studies
Subject name: Soil ameliorations
Teacher (s): Snežana B. Belanović-Simić, DSc; Predrag Miljković
Subject type: compulsory
ECTS: 6
Condition:
Subject aim: Introduction to the problems and acquisition of knowledge in the field of water - air soil regime, irrigation and drainage systems, methods of applying underground meliorations as well as measures to improve the chemical properties of the soil.
Subject outcomes: Full students' ability to create practical solutions in this field, as well as preparation for master studies.
