

Specification of subjects in doctoral studies

Subject code: ДМ4.0111Б
Study program: Ecological engineering for soil and water resources protection
Type and level of studies: Doctoral studies
Subject name: Monitoring of the processes of soil degradation and erosion and torrential processes
Teacher (s): Grozdana Gajić, DSc
Associates:
Subject type: elective
ECTS: 8
Condition:
Subject aim: Soil resources information and monitoring are a basic elements of all strategic and developmental soil protection documents. Monitoring of erosion and torrential processes are essential for a more efficient protection of soil and land from these processes that cause great damage.
Subject outcomes: Acquired knowledge on soil degradation monitoring methods and in particular soil (water and eolic) erosion monitoring and torrential floods.
