

Specification of subjects in undergraduate studies

Subject code: ΠΑ3526
Study program: Landscape architecture
Type and level of studies: undergraduate studies
Subject name: Production of planting material
Teachers: Mihailo N. Grbić, DSc; Dragana Skočajić, DSc
Associates: Nataša Petković, graduate engineer
Subject type: compulsory
ECTS: 10
Condition: no
Subject aim: Mastering the production of seedlings of ornamental trees and shrubs and familiarization with the technique and technology of planting material production.
Subject outcomes: Acquiring knowledge and skills that enable the student to work in the production of ornamental trees and shrubs, both in the process of reproduction, and by forming different categories of seedlings (from fast-growing shrubs, to woody seedlings). Knowing the different methods of reproduction (generative, cuttings, grafting ...) and cultivation technologies (classical, containerized) are also the outcome of this subject.
